

AARTI VARSHNEY

MIS Executive | Data Analytics Professional | Power BI & SQL Specialist

Delhi, India | +91-8287887125 | aartivarshney110@gmail.com | LinkedIn: linkedin.com/in/aarti-varshney

PROFESSIONAL SUMMARY

Results-driven MIS Executive and Data Analytics Professional with 5+ years of progressive experience in MIS reporting, Power BI dashboard development, SQL-based data extraction, and business process automation. Currently delivering critical operational reports — including Yield, Utility, Sales Funnel, Productivity, and Production vs. Planning — at PARAM Dairy Limited. Previously reduced manual reporting errors by ~40% through Excel automation at Shri Kanhayya Agency. Certified in Microsoft Excel Expert and Data Analytics, with additional expertise in AI tools and prompt engineering. Passionate about translating complex raw data into clear, actionable business insights that drive data-driven decision-making.

TECHNICAL SKILLS

Data Visualization: Power BI (Advanced), Tableau (Beginner), Excel Charts & Dashboards

Databases & Querying: SQL – Joins, Sub-queries, Data Extraction & Transformation (Intermediate)

Spreadsheet Tools: Advanced Excel – PivotTables, VLOOKUP/XLOOKUP, Macros, Conditional Formatting

Reporting: MIS Reports, KPI Dashboards, Yield Reports, Utility Reports, Sales Funnel, Productivity Tracking, Production vs. Planning

Collaboration & Office: MS Office Suite (Word, Excel, PowerPoint), Google Sheets, Google Workspace

AI & Automation: ChatGPT, Prompt Engineering, AI-assisted reporting tools

Core Competencies: Data Cleaning, Data Validation, Trend Analysis, Process Automation, Root Cause Analysis

WORK EXPERIENCE

MIS Office Executive

Feb 2026 – Present

PARAM Dairy Limited | Delhi NCR

- Design and deliver daily operational MIS reports covering Yield, Utility, Sales Funnel, Visit Tracking, Productivity, and Production vs. Planning across departments.
- Monitor and analyze yield data to identify production inefficiencies and support management with data-backed corrective actions.
- Prepare utility consumption reports (electricity, water, fuel) to drive cost optimization and sustainable operations.
- Build and maintain Sales Funnel and Visit dashboards, enabling the sales team to track lead progression, conversion rates, and field team performance.
- Create Productivity reports benchmarking individual and team output against daily/weekly targets, supporting HR and operations decisions.
- Generate Production vs. Planning reports to highlight variances between planned and actual output, enabling real-time course correction.
- Collaborate with cross-functional teams (Operations, Sales, HR, Finance) to ensure data accuracy and timely report delivery.
- Automate recurring reports using Advanced Excel (Macros, PivotTables) to reduce manual effort and improve turnaround time.

Data Analytics Trainer Intern

May 2025 – Jan 2026

DSSD | Delhi

- Conducted structured training sessions on SQL, Power BI, Advanced Excel, and MS Office tools for batches of aspiring data analysts.
- Designed and delivered 10+ case study-based projects covering end-to-end workflows from data cleaning to interactive dashboard creation.

- Guided 30+ students in building real-world analytics projects, improving student placement readiness and practical skill application.
- Developed training material including project templates, datasets, and step-by-step guides for self-paced learning.

MIS (Office Executive)

Oct 2019 – Nov 2023

Shri Kanhayya Agency | Delhi

- Managed and processed datasets of 10,000+ records to prepare 15+ daily, weekly, and monthly MIS reports for sales and operations teams of 20+ stakeholders.
- Reduced manual reporting errors by ~40% and cut report preparation time from 3 hours to under 45 minutes by introducing Excel macro-based automation.
- Built structured Excel dashboards for sales tracking, inventory management, and performance KPIs, supporting management in data-driven business decisions.
- Collaborated with management to standardize data collection processes and improve reporting accuracy across departments.
- Performed root cause analysis on data discrepancies and implemented validation checks to ensure data integrity.

KEY PROJECTS

Production Planning Dashboard

- Developed a comprehensive Production Planning Dashboard to monitor production schedules, capacity utilization, inventory levels, and operational performance.
- Automated reporting processes and delivered actionable insights to support production planning and resource optimization.

Sales Funnel Dashboard

- Designed and implemented a Sales Funnel Dashboard to analyse lead progression, conversion rates, pipeline performance, and sales trends.
- Enabled data-driven decision-making through interactive dashboards and automated performance reporting.

Employee Performance Scoring Dashboard

- Developed an Employee Performance Scoring Dashboard to evaluate employee performance using KPI-based scoring and performance metrics.
- Automated performance tracking and generated analytical reports to support HR evaluations and management decision-making.

Tech Stack: Power BI | Advanced Excel | Power Query | DAX | SQL (add only the tools you actually used)
